Summary

Google-certified TensorFlow developer, machine learning enthusiast and **Linux enthusiast** with a strong background in the medical field, and **1.5 years** of working experience as a Freelance Machine Learning and Data Scientist

EXPERIENCE PROJECTS

Freelance Data scientist and Machine Learning Engineer

November 2021- Present

Location - Myanmar

Successfully solved industry-complex **data storage**, **data modeling**, and **machine learning** problems using machine learning and deep learning techniques.

- Developed an 80% accuracy **fraud detection classification model for local bank sectors**, **optimizing accuracy**, reducing false positives, and addressing data engineering workload.
- Implemented an **automatic ETL pipeline** that lead to reducing the data engineering workload by **10%** and ensure monitoring of real-time data drift, data qualities and model performance.
- Built a **Text Summarization website** as a personal hobby project, leveraging natural language processing techniques and testing with state-of-the-art models.
- Utilized oversampling and undersampling techniques to address **imbalanced datasets**, searching for noise patterns, improving model generalisation by 30%, and achieving 99% accuracy.
- Developed models for **weather temperature detection** and energy price detection using time series analysis.

Achievement

Google TensorFlow Developer Certificate ([@link](#))

Skills

- | | | |
|----------------|-----------------|-----------|
| • Scikit Learn | • TensorFlow | • Pandas |
| • NumPy | • Prefect orion | • MLFlow |
| • SQLite | • PostgreSQL | • Docker |
| • Matplotlib | • EvidentlyAI | • Seaborn |
| • GitHub/ Git | • AWS | • Python |
| • C++ | • Linux | • VIm |

Languages

- **English** - Business Level proficiency
- **Myanmar** - Native

Education

Final year medical student studied at the University of Medicine 2, Yangon, Myanmar.

Soft skills

- **communication**
- **organisation skills**
- **problem-solving**
- **time management**
- **Strong leadership**
- **task prioritisation skills.**
- **Generalize** real-time problems

CURRENT PROJECTS

- Personal website
- ETL website
- Projects on UW-Madison GI Tract Image Segmentation,
